

FLASH JUKE BOX

Abstract of Disclosure

A memory card reading apparatus including a plurality of memory card interfaces, with at least a subset of the plurality memory card interfaces configured to interface with a memory card of a first type, the plurality of memory card interfaces accessible in parallel. In one embodiment, at least one of the memory card interfaces is configured to interface with a plurality of different memory card types. In another embodiment, a first subset of the plurality of memory card interfaces are configured to interface with a memory card of a first type and a second subset of the plurality of memory card interfaces are configured to interface with a memory card of a second type, wherein the first and second subset of memory card interfaces are accessible in parallel. In yet another embodiment, at least one of the memory card interfaces includes an indicator identifying a status of an operation for a respective memory card interface.
